Production of medicines under GxP standards

In production we use high quality raw materials from certified suppliers

The multistage quality control system provides input control of raw materials, control of the production process and quality control of the produced medicines

Total production growth rate from 2018 to 2024 was about 233%

In 2024 we produced more than 1034 million tablets, 186 million capsules, 31 million sachets and more than 15 million ampoules
